

Letter from Robert Morgan written to Alex Breitler with the Stockton Record

Nov. 7th, 09

Dear Alex Breitler; Staff Writer

I read the article you wrote about my husband and I being kept separated. I have some compelling information about this issue should you be interested in writing the true facts of this keep apart order.

On Nov. 16th I will again ask the court to be permitted to sit by my co-defendant Jorge Morgan.

Up to this point the proceedings have been fusterating, but not stressful; However, we about to enter a point in our case that will be very stressful, this concerns me because I suffer from Epileptic seizures (Grand Maul) the worst kind and my seizures are induced by stress, this is my concern.

- 1) Should I have a seizure in the courtroom, the bailiffs have to maintain security, so I would have to suffer and possibly hurt myself by hitting my head before help arrived.
- 2) My seizures are not under control, even though I'm on seizure medications.
- 3) If I were sitting next to my codefendant/husband he would know how to take care of me and keep me from hurting myself until medical help arrived.
- 4) I have been to "almost" every hospital in Northern California by both ambulance and helicopter, that's how severe my seizures are. I was even taken by ambulance from S.J.C.J. where the seizure impaired my speaking and movement.

It's important to know the following facts.

- A) Lt. K. Maule testified Jorge and I are not in danger of each other.

B) Yes we love each other, but its not like were going to jump on the table in court to have sexual relations

C) since 08/09 Jorge and I have not acted in any way that could even be misunderstood as a security risk, to the Deputy D.A., to Your Honor, to the Bailiffs or anyone in the court room.

D) We may be in danger from other inmates as they claim, but theres no other inmates in the court room

E) in 08/09 when we first started our case Jorge and I sat together with no security issues at all.

I can show you transcripts of a conversation in the Judges Chambers and you will see for yourself the D.A.'s motives and many times her and the judge change there position on this issue

Again this isn't about the
KSE order, that will be discussed
later in the appellate court
This issue is about whether
the court cares about my
personal medical well being
and allows my codefendant
and I to sit together, not
only to assist both attorneys
with our case but to be
there to assist me should I

4

suffer from a seizure, that can
be life threatening.

Lastly, if at all possible
please Always put Jorge's
name before mine like

→ Jorge and Robert Morgan

Because it is his last name
that I took on Nov. 13th 2008.

Thank you for your time
and I hope I've gotten your
interest so you may want
to write another story, I
will provide you with an
interview and proof of my
claims.

Sincerely

Robert Morgan
